Data Update – Acquisition Domain Role within a Net-Centric DoD

Presented to JAEBOB

12 June 2003

Data Landscape

- **DoD Net-Centric Enterprise Services**
  - Part of the GIG Enterprise Services (GES) Scope
  - 9 Core Enterprise Services (CES)
    - Application - Enterprise Service Management - Storage
    - Discovery - Security - Messaging
    - Collaboration - User Assistant - Mediation
  - 4 Working Groups have been formed to address CES
    - Data - Net Ops & ESM - Collaboration & Messaging - IA/Security
  - Data Working Group has 3 Sub-Activity Areas
    1. DoD **Metadata Registry Content** and organization/process management
    2. Development and configuration management of **Enterprise Metadata Standards**
    3. Support **Discovery and Mediation** Core Enterprise Services definition, processes
  - Representation in Working Groups from all Services, BMMP, Joint Staff, DISA, DFAS, Logistics Domain, and others.

Domain Representation

▸ The Acquisition Domain is representing you by playing two roles within these Working Groups

- Influencer

  • The Acquisition Domain will assist in the requirements generation process for the Working Groups

  • This is our role within the Data Working Group and Collaboration and Messaging Working Group

- Reactor

  • Due to limited resources, the Acquisition Domain will react to the decisions of the working group as necessary

  • This is our role within the Net Ops & ESM Working Group and the IA/Security Working Group

Alignment with Acquisition Domain Data Management Approach

▸ GIG Enterprise Services and Net-Centric Enterprise Services are the long-term DoD strategy and will provide the ability and application for business intelligence.

▸ This strategy will correlate directly with BMMP Architecture

▸ The Data Management Approach will align directly with these activities
  - The Data Management Forum charter is being finalized for approval
  - Representation is needed for the Forum
  - Anticipated first meeting date is 1 July, Time and Location TBD
  - The information and views gathered as part of the Data Management Forum will be input directly into the Net-Centric vision and planning

▸ You are welcome to attend Net-Centric Working Group meetings. Contact Kathy Fenk or Andy Glaser for details.
